

M4GEEK01 - TODO LIST

- ☐ Groove table
- ☐ Pattern transpose data saving
- ☐ Check every slot is usable

- ☐ Color editor
- ☐ Decide the new interface amongst all the mockups:

- ☐ Hide master clock if link mode is not GBA
- ☐ Involve sync rate and ticks into sync net code
- ☐ Send data through serial
- ☐ Receive data through serial
- ☐ Show link status on bottom of the screen

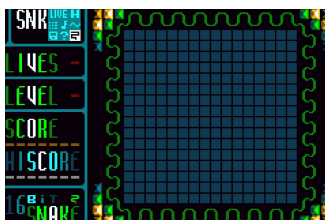

- ☐ AUTOSAVE Option @ Behavior: If enabled, song is autosaved on playback stop
- ☐ Multiple input schemes (input code should be rewritten for this)
- ☐ Take key rate in consideration
- ☐ Autoload if SRAM data is valid and only if its valid.
- ☐ Show basic keys (which change with buttonset) @ footer

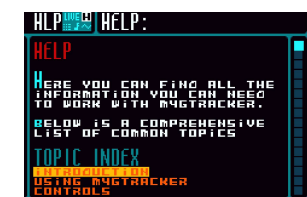

- ☐ Prelisten on Tracker class
- ☐ Remove input mode setting
- ☐ Remove sound BIAS setting, it does no function and it can be harmful for real hardware
- ☐ Global mixer interface

- ☐ Show total memory in blocks @ footer

- ☐ Snake Score Backup / Loading
- ☐ Emit sounds using Synth:polysynth function

- ☐ Help pages for Nze Channel
